## Smart Travel

### ⑤ DUI Modular Bag System

Convenience and security are two essential features for travel gear; with the DUI Modular Bag System, you get both in one package. The DUI Modular Bag System is comprised of a Roller check-in bag and a Backpack carry-on. They can be strapped together for the sidewalk shuffle and then separated at the check-in counter.

The Roller is a full-size bag but extremely light, weighing in at just under 9 pounds. It has a pop-up handle for easy towing and hidden shoulder straps so you can convert it to a backpack. A single external zipper with double sliders opens the main lid on three sides for great access and is easily secured with a TSA lock. Two internal zippered compartments organize gear and have the added security of offering entry only from the inside. Two large external compression straps keep pressure

off the zipper when loaded and offer attachment points for the Backpack bag. Handles on all four sides make lifting easier, and the base and wheels are heavy duty and stable. We were able to pack all our regular gear plus some clothes with room to spare. Just be careful not to load it beyond the 50-pound limit most airlines enforce.

The Backpack carry-on weighs just 3 pounds and on the inside offers a large compartment with padded dividers to protect regulators, computers, cameras or lights. It also has a laptop pouch and multiple small compartments. Outside, it has heavy-duty compression straps that can be used to attach to the Roller bag. It features padded shoulder straps and a top handle for an easy carry. The DUI Modular Bag System is so clean and efficient, we're actually looking forward to our next trip to the airport.
